1. The nurse is preparing a smoking cessation class and is amazed at how many people still smoke even with the information on lung cancer so readily available. She believes that her class will convert many smokers to nonsmokers once they get all the latest information. The nurse is a believer in which of the following health care models?

- A) Health Belief Model
- B) Health Promotion Model
- C) Basic Human Needs Model
- D) Holistic Health Model

Correct Answer: A

2. The health care model that utilizes Maslow's hierarchy as its base is the _____ Model.

- A) Health Belief
- B) Health Promotion
- C) Basic Human Needs
- D) Holistic Health

Correct Answer: C

3. The patient is describing moderate incisional pain that was not relieved by the last dose of hydromorphone (Dilaudid) given 90 minutes earlier. The patient is not due for another dose of medication for another 2 1/2 hours. The nurse repositions the patient, asks what type of music she likes, and puts on the music channel on the television, setting it to play that type of music. The nurse is attempting to utilize which health care model?

- A) Health Belief Model
- B) Health Promotion Model
- C) Basic Human Needs Model
- D) Holistic Health Model

Correct Answer: D

4. Many variables influence a patient's health beliefs and practices. Internal and external variables influence how a person thinks and acts. An example of an internal variable would be

- A) Perception of functioning.
- B) Family practices.
- C) Socioeconomic factors.
- D) Cultural background.

Correct Answer: A

5. The nurse is admitting a patient with uncontrolled diabetes mellitus. It is the fourth time the patient is being admitted in the last 6 months for high blood sugars. During the admission process, the nurse asks the patient about her employment status and displays a nonjudgmental attitude. Why does the nurse do this?

- A) Noncompliant patients thrive on the disapproval of authority figures.
- B) External variables have little effect on compliance.
- C) A person's compliance is affected by economic status.
- D) Employment status is an internal variable that impacts compliance.

Correct Answer: C
